

MSS Custodian +

Custodian is an easy to use document imaging and retrieval system which allows electronic management of storage and distribution of patient documents and images throughout the hospital network.

Custodian enables stored information to be accessed for viewing, printing, faxing or e-mailing.

Custodian prevents lost data and reduces wasted labour time searching for manually scanned paper documents or images from your storage departments and files.

Key Features and Benefits

SCANNING

- Scanning – capturing the patient documentation (e.g. CAS cards) and converting it into a digitised electronic image.

INDEXING

- Means of filing and retrieving the stored documents for easy reference. e.g. by PAS number, A&E reference etc.

DATA IMPORT

- Retrieval of information from existing hospital systems for automatic indexing.

RETRIEVAL

- Accesses the stored data for viewing, printing faxing or emailing.

ARCHIVING

- Long term storage and management facility.

GENERAL FEATURES

- Custodian improves your paper handling and reduces labour costs.
- Compatible with AS/400, Unix and PC networks.
- Competitively priced.
- Can be tailored to suit your individual needs.
